

Value Education

The New Education Policy (NEP 2020) has placed considerable emphasis on the necessity of promoting Value Based Education in the country. It has been said that in face of the rapid changes underway, the deep rooted values and philosophical foundations of India need to be strengthened. Such efforts will have substantial contributions in shaping ethically and intellectually sound citizens of the future. Value Education not only enables students to develop sound moral principles but also teaches them to be disciplined, responsible, and tolerant, central to the goals of democratisation, co-operative citizenship and integration in the country.

Following these, and the teachings of the visionary Swami Vivekananda, Sri Ramakrishna Dev and Sri Sarada Devi, the College strives to provide a comprehensive exposure to value based education to students. The value education course in Ramakrishna Sarada Mission Vivekananda Vidyabhavan has been divided into three basic modules that cover the lives, work and visions of its three guiding beacons and runs the course of the entire three-year undergraduate programme. This is viewed to be an anchor in providing a preliminary introduction to the wider values of Indian society to the students.
