

## RKSMVV COVID-Helpdesk

The helpdesk has been created during the deadly second wave of COVID, as a platform of verified information for the benefit of all stakeholders of the College. The aim of the helpdesk is:

- To provide verified information for COVID care
- To create sensitization regarding protocols, safety measures, vaccines etc.

The document will have information that is personally verified by us, with contact details and other relevant information. However, as resources are constantly being used, the availability is subject to change. We will keep updating the list to the best of our abilities.
