Brief Description: Our department often arranged and applied this technique for the development of students. 14 students in 2nd semester practiced micro-teaching on teaching-learning strategies of Arithmetic under the guidance of Prof. Tanju Datta, Dept. of Education, RKSMVV. They got an opportunity to perform the act of teaching.

Programme Outcome

Microteaching, a teacher training technique currently practised worldwide, provides teachers with an opportunity to perk up their teaching skills by improving the various simple tasks called teaching skills. With proven success among the novice and seniors, microteaching helps to promote real-time teaching experiences. The core skills of microteaching such as presentation and reinforcement skills help novice teachers to learn the art of teaching at ease and to the maximum extent. The impact of this technique has been widely seen in various forms of education such as health sciences, life sciences, and other areas.
