

Name of the Event: Scrap to Table

Category: Student Activity

Organizing unit: Innovation and Incubation Cell

Date: 5th December 2024

Time: 1:15 PM

Venue: Swamiji Bhavan

No. of Participants: Selected students from all departments.

Brief Description of the event: The "Scrap to Table" event, organized by the Innovation and Incubation Cell, took place on 5th December 2024 at 1:15 PM. The event aimed to encourage students from various departments to explore creativity and sustainability by transforming scrap materials into functional or decorative furniture. By bringing together students from different disciplines, the event fostered collaboration, innovative thinking, and hands-on problem-solving.

Participants were given various scrap materials such as wood, metal, plastic, and fabric, and tasked with designing and crafting functional furniture items, particularly tables, using these resources. Throughout the event, they received guidance from experts in recycling, sustainable design, and crafting techniques. The students also learned valuable skills in tool handling, design, and the importance of sustainability in everyday life.

Programme Outcome: The "Scrap to Table" event led to several key outcomes:

1. **Fostering Innovation and Creativity:** The event encouraged students to think outside the box and apply creative solutions to transform discarded materials into useful and functional furniture.
2. **Sustainability Awareness:** Participants gained a deeper understanding of how recycling and sustainable practices can contribute to reducing waste and promoting environmental responsibility.
3. **Skill Development:** Students honed their practical skills, including design thinking, crafting, and problem-solving, as they worked with various materials to create functional tables.

4. **Cross-Disciplinary Collaboration:** The event brought together students from multiple departments, fostering a collaborative atmosphere where ideas and techniques were shared, enhancing the overall learning experience.
5. **Environmental Impact:** The event highlighted the significance of recycling and reusing materials, making participants more conscious of their environmental impact.

The "Scrap to Table" event organized by the Innovation and Incubation Cell was a great success. It not only encouraged students to apply innovative thinking in sustainable design but also provided them with valuable hands-on experience in recycling and crafting. By bringing together students from different disciplines, the event created a collaborative and enriching environment, reinforcing the importance of sustainability and creativity in solving real-world problems.
