- **Number of Participants :** 105 students of Semester-1, 4 & 6.
- **Brief description of the event :**

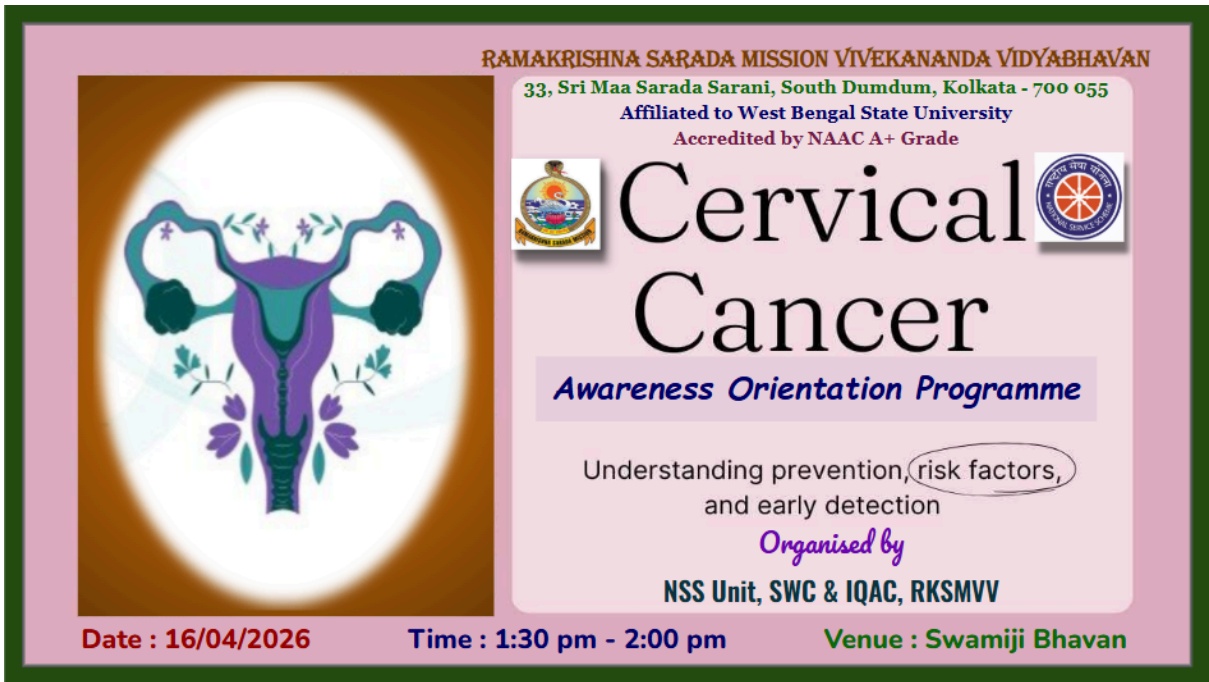

A Cervical Cancer Awareness Orientation Programme was successfully organized on 16th April, 2026 with the objective of spreading awareness about cervical cancer, its causes, preventive measures, and the importance of early detection among women. The programme aimed to educate participants about maintaining reproductive health and encouraging regular health check-ups.

The session highlighted key topics such as the causes and risk factors of cervical cancer, common symptoms, the role of Human Papillomavirus (HPV) in the development of cervical cancer, and the importance of HPV vaccination and Pap smear screening as effective preventive measures.

- **Programme Outcome :**

The Cervical Cancer Awareness Orientation Programme conducted on 16th April 2026 aimed to enhance awareness and promote preventive practices among participants regarding cervical cancer. The programme successfully achieved the following outcomes:

- Participants gained comprehensive knowledge about cervical cancer, including its causes, risk factors, early symptoms, and preventive measures.
- The programme highlighted the importance of regular health check-ups, Pap smear tests, and vaccination against Human Papillomavirus (HPV) as effective preventive strategies.
- Participants were encouraged to adopt healthy lifestyle habits and maintain personal hygiene to reduce the risk of cervical cancer.
- The session emphasized the significance of early detection and timely medical consultation, helping participants understand that early diagnosis greatly improves treatment outcomes.
- Participants were motivated to share the knowledge gained with family members and the community, thereby acting as awareness ambassadors.
- The programme encouraged women to utilize available healthcare facilities for screening and vaccination services.
